(c) If a servant has served in the University for more than 20 years, a gratuity at the rate of one and a half month's pay for each year of completed service may be paid to the servant himself, if he has been permitted to retire from the service of the University on the ground of incapacity, or may be paid to his family if he dies while in the service of the University.

(d) Notwithstanding anything contained in this Statute a gratuity exceeding Rs. 500 shall not be paid to any servant or to his family.

CONDITIONS OF SERVICE, LEAVE, ETC.

Definition—

1. In these rules "Average pay" means the average monthly pay earned during the twelve complete months immediately preceding the month in which leave is taken, provided that in the case of any person who has been on leave during those twelve months such period of leave shall be omitted from the calculation.

Provided also that in the case of a member of the ministerial staff drawing a monthly pay of Rs. 300 or less, the average pay shall be deemed to be the pay earned at the date when leave is granted.

Vacation counts as duty for the purposes of this rule.

For purposes of the above calculation, allowances granted for a specific purpose, such as conveyance allowances, house rent, etc., are not taken into account, nor are such allowances as fees for examination and travelling allowances.

2. These Leave Rules apply to all permanent officers, teachers or clerks of the University, excluding those lent by Government who continue to be under the Government Leave Rules, *i.e.*, the Fundamental Rules or Civil Service Regulations, as the case may be.

3. Officers, teachers or clerks, who having resigned Government service or retiring therefrom, have accepted employment under the University, are entitled to add to the leave earned by service under the University, such amount of leave earned under Government and at their credit on leaving Government service as may be agreed upon by any special contract made between them and the University at the time of entering into service of the University.

General Conditions —

4. Leave is earned by duty only.

5.(a) An officer, teacher or clerk who resigns or is discharged from the employment of the University, cannot, if re-employed after an interval, count his former service towards leave without permission of the authority re-appointing him.

(b) An officer, teacher or clerk who is dismissed or removed from the University service but is reinstated, is entitled to count his former service towards leave unless the authority reinstating declares that he shall not be entitled to count it in whole or in part.

6. Leave cannot be claimed as of right. When the exigencies of the University service so require a discretion to refuse or revoke leave of any description is reserved to the authority empowered to grant it.

7. Leave ordinarily begins on the day on which an officer, teacher or clerk relinquishes his duties and ends

Ch. XX. on the day preceding the date on which he resumes them, or if duties are relinquished or resumed in the afternoon, the leave shall commence or end respectively on the following day.

8. All orders recalling an officer, teacher or clerk to duty before the expiry of his leave should state whether the return to duty is optional or not. If it is optional the person so recalled is entitled to no concession. If it is compulsory, he is entitled :—

(a) If the leave from which he is recalled is out of India :

- (i) to receive a free passage to India ;
- (ii) to count the time spent on the voyage to India as duty for purposes of calculating leave ; and
- (iii) to receive leave salary during the voyage to India, and for the period from the date of landing in India to the date of joining his post to be paid leave salary at the same rate as he would have drawn had he not been recalled.

(b) If the leave from which he is recalled is in India :

- (i) to be treated as on duty from the date on which he starts for the place to which he is recalled ; and
- (ii) to draw travelling allowance for the journey ; but
- (iii) to draw leave salary only until he resumes charge of his duties.

9. An officer, teacher or clerk who remains absent after the end of his leave is not entitled to leave salary during the period of such absence, and that period will be debited against his leave account as though it were leave on half average pay, unless his leave is extended by the authority authorised to grant leave. Wilful absence from duty after the expiry of leave may be treated as misbehaviour.

10. Leave to officers and teachers is granted by the Executive Council and that to members of the clerical

and administrative staff by the Heads of the offices to which they are attached after consulting the leave account. Ch. XX

Kinds of Leave—

11. Leave may be of the following kinds ; which may be combined with each other, subject to limits laid down in Rules 17 (b), 17 (c) and 18:—

- (i) Leave on average pay ;
- (ii) Leave on half average pay ;
- (iii) Leave on quarter average pay ;

For purposes of calculation leave on half or quarter average pay counts as equivalent to half the period of leave on average pay. Study Leave and Leave Without Pay are not debited to the leave account.

NOTE :—Casual leave for short periods is not treated as regular leave and is not debited to the leave account (see Rule 22). Casual leave may not be combined with regular leave of any kind or with joining time.

12. A leave account shall be kept for each officer, teacher or clerk in the attached form.

Leave due—

13. 14. The leave due to an officer, teacher or clerk, is the amount of leave earned, representing the credit under Rule 15, less the amount of leave taken representing the debit under Rule 16.

Ch. XX. period equal to $\frac{5}{22}$ nds of the period of duty, limited, however, to a total period of $2\frac{1}{2}$ years plus one-eleventh of the period of duty. This amount can be increased by the period of leave spent out of India or Ceylon up to a limit of 6 months.

16. From the amount of leave earned by an officer shall be deducted :—

- (a) The actual period of leave on average pay taken ;
- (b) Half the period of leave on half or quarter average pay taken.

Leave Admissible—

17. Leave admissible will be:—

- (b) On half average pay up to double the amount of leave on average pay at credit, subject to the limit of 28 months' leave at one time inclusive of leave on average pay, if any.
- (c) Leave after 28 months cannot be granted without a Medical Certificate and shall be on quarter average pay.

18. No officer, teacher or clerk can take leave continuously for more than five years either with or without allowances.

Vacation—

19. (a) Vacation counts as duty but the period of total leave in rules 15 and 17(a) shall ordinarily be reduced by one month for each year of duty in which an officer, teacher or clerk availed himself of the vacation. If a part only of the vacation has been taken in any year

the period to be deducted will be a fraction of a month equal to the proportion which the part of the vacation taken bears to the full period of the vacation. Ch. XX.

(b) In cases of urgent necessity, when an officer, teacher or clerk requires leave and no leave is due to him, the period in rules 15 and 17(a) as reduced by clause (a) of this rule, may be increased by one month for every two years of duty in a vacation department.

(c) When an officer, teacher or clerk combines vacation with leave, the period of vacation shall be reckoned as leave in calculating the maximum amount of leave on average pay which may be included in the particular period of leave.

Leave not due taken in advance—

20. (a) Leave not due may be granted subject to the following conditions :—

- (i) On Medical Certificate without limit of amount.

21. Study leave on half average pay for a period not exceeding two years, may be granted to a teacher of not less than four years standing. All applications for study leave must be accompanied by a statement of the work the teacher intends to do during the leave, and on return from leave the teacher must submit to the Academic

Ch. XX. Council a report of the work he had done. Such leave is not debited in the leave account. Study leave may be combined with other leave subject to the limits in Rules 17(b), 17(c) and 18.

21. (a) With the special permission of the Executive Council study leave in India on two-thirds of average pay for a period of not less than four months at a time may be granted to a teacher of not less than four years' standing up to the amount of such leave which the teacher concerned could take out of India and Ceylon under ordinance 17 (a), but leave on two-thirds of average pay granted under this ordinance shall be debited to the teacher's leave account.

21. (b) When leave is granted to a teacher for the purposes of study abroad and a Government or other scholarship for such purpose is awarded to him, if such scholarship is equal to or exceeds the amount of his pay from the University, his leave shall be without pay; and in other cases his leave pay, if any, shall not exceed the difference between such scholarship and his pay from the University.

Casual Leave—

22. Casual leave, which cannot be accumulated and cannot be joined to any other sort of leave, can be granted for 14 days in one academic year :—

- (i) By the Vice-Chancellor to an officer or teacher of the University ;

Leave granted under this proviso may not be combined with any other kind of leave or holidays except

Sundays ; and shall not be debited to a teacher's leave account ; but, if such leave is taken, the teacher shall not be entitled to credit in his leave account, under this ordinance for any fraction of the period during which he was invigilating. Ch. XX.

(NOTE.—Applications of the Heads of departments should be submitted to the Vice-Chancellor direct and of others through their departmental heads.)

23. When no other leave is by ordinary rules admissible, leave without allowance for a period not exceeding two years may be granted by the Executive Council under conditions to be determined in each individual case provided that the interests of the University are not prejudiced by such grant of leave. Such leave is not debited to the leave account.

Leave Salary—

24. Subject to the conditions in rules 17, 18 and 20 an officer, teacher or clerk on leave shall, during leave, draw leave salary as follows :—

25. When an officer or teacher of the University who draws an allowance or is exempted from payment of house rent goes on leave, such privileges are withdrawn during the period of leave and may be conferred on the officer or teacher who undertakes the duties for which the privileges are granted.

N.B.—If possible, statistics should be obtained not only for India but for two or three other countries for purposes

of comparison. Comparison with England will give the greatest contrast with regard to industry and trade, but for many purposes comparisons with America, France or Japan are more instructive because they depend more largely on their own agriculture. America is like India in having a great variety of climate and great differences in density of population, and in exporting wheat and cotton and importing sugar. Therefore, a comparison with America is in some respects less misleading, but in other respects more misleading than a comparison with England. For the comparison of statistics and drawing of charts to illustrate them Philip's "Chamber of Commerce Atlas," and many commercial geographies will be found exceedingly useful. Students should make their own charts exhibiting the principal statistics of India. Statistics such as density of population, birth and death rates, infant mortality, rainfall or mean temperature can best be exhibited by colouring maps with deeper shades of one colour to represent higher figures below and above the average. Statistics of the increase or decrease of population or value or other data can best be made also with two colours, one colour showing increase, the other colour showing decrease and the darker shades of both colours showing a greater percentage of increase or decrease. A chart of the occupations of the people of India can best be made by using different colours for the great occupation groups, and using different shades for male workers, female workers and dependents. Many interesting charts are given in Kale's *Indian Economics* where different hatchings are used instead of different colours. Within India comparisons between the Chief Provinces and India as a whole will be valuable. Every student is expected to draw at least two charts illustrating the above data before he can be sent up for the University Examination.

NOTE.--Teachers will be expected to compare the principal statistics of India with those of other countries. Students are expected to visit factories, agricultural demonstration farms, and co-operative societies.

1929.—Mr. Narendra Nath Ghatak and Mr. Brij Behari Dikshit.

THE ALLAHABAD JUBILEE FUND.

At a general meeting held at Allahabad on November 24, 1887, for the purpose of disposal of the money subscribed for commemorating Her Majesty Queen Victoria's Jubilee, it was decided that the fund amounting to Rs. 19,600 be invested in Government or other securities guaranteed by Government, Imperial or Local, and the income thereof annually expended in providing certain bursaries and Medals to be awarded 'among the students of the University of Allahabad under such Regulations and according to such scheme as are hereafter established and set forth'.

The scheme provided for the award of the following bursaries and medals from the income of the Fund every year :—

- (1) A bursary of Rs. 200 to such student of the Muir Central College at Allahabad as the Registrar of the Allahabad University may report to the trustees as the most successful candidate at the annual examination held by the said University for the degree of Bachelor of Laws.
- (2) A bursary of Rs. 200 to such student of the said College as the said Registrar may report to the trustees as the most successful candidate at the annual examination held by the said University for the degree of Bachelor of Arts and as having in such examination taken up Arabic as the second language.
- (3) A bursary of Rs. 200 to such student of the said College as the said Registrar may report to the trustees as the most successful candidate at the last mentioned examination and as having in such examination taken up Sanskrit as a second language.

- (4) A gold medal to such student of the said College as the said Registrar may report to the trustees as the most successful candidate at the annual examination held by the said University for the degree of Master of Arts.
- (5) A silver medal to such student of the Allahabad Boys' High School as the said Registrar may report to the trustees as the most successful candidate at the annual Entrance examination held by the said University.
- (6) A silver medal to such student of the Allahabad Zillah School as the said Registrar may report to the trustees as the most successful candidate at the last-mentioned examination.

In the event of any surplus of income remaining in the hands of trustees in any year after providing for the bursaries and medals aforesaid whether in consequence of any increase in the funds at the disposal of trustees or of any bursary or medal being withheld the trustees had power to apply such surplus or any part thereof to such educational purposes as they in their discretion might determine.

In 1926 Rai Bahadur Pandit Baldeo Ram Dave, who was the sole surviving trustee, appointed, by a trust deed, Mahamahopadhyaya Dr. Ganganatha Jha, Vice-Chancellor, Allahabad University, Dr J. C. Weir, Professor of Law in the Allahabad University, Rai Bahadur Pandit Kanhaiya Lal, and Dr. S. M. Sulaiman, Puisne Judges of the High Court at Allahabad as the trustees of the said Fund which then amounted to Rs. 31,000 invested in $3\frac{1}{2}$ per cent. Government Promissory Notes. And as the Muir Central College has ceased to exist as an independent institution and is now absorbed in the teaching and tutorial side of the University of Allahabad and as the Allahabad University has ceased to examine students for the entrance

examination the Trustees have revised the scheme which now provides for the award of the following bursaries and medals so long as the income is sufficient for the said purpose :—

- (1) A scholarship of Rs. 20 per month for ten months to such student of the University of Allahabad (Internal Side) as the Registrar of the Allahabad University may report as the most successful candidate at the annual examination held by the said University for the degree of Bachelor of Laws and who joins the Final LL.B. class of the Internal Side of the said University in the session immediately following that in which he passed the previous examination.
- (2) A scholarship of Rs. 10 per mensem for 20 months to such student of the said University (Internal Side) as the said Registrar may report as the most successful candidate at the annual examination held by the said University for the degree of Bachelor of Arts and as having in such examination taken up Arabic as the second language and who joins the M.A. class in Arabic. The scholarship shall cease to be payable if the holder of it does not pass the Previous examination for the M.A. degree in Arabic.
- (3) A scholarship of Rs. 10 per month for 20 months to such student of the said University (Internal Side) as the said Registrar may report as the most successful candidate at the last mentioned examination and as having in such examination taken up Sanskrit as a second language and who joins the M.A. Previous class in Sanskrit. The scholarship shall cease to be payable if the holder of it does not pass the Previous examination for the M.A. degree in Sanskrit.

- (4) A gold medal to such student of the said University (Internal Side) as the said Registrar may report as the most successful candidate at the annual examination held by the said University for the degree of Master of Arts.
- (5) A gold medal to such student of the said University as the said Registrar may report as the most successful candidate at the highest annual examination in Science held during the year.
- (6) A silver medal to such student of the said University (Internal Side) as the said Registrar may report as the most successful candidate at the annual examination held at the said University for the degree of Bachelor of Commerce.

In August, 1927. the Trustees of the Fund passed the following additional Regulations in connection with the scheme:—

1. The value of the gold and silver medals be determined by the requirements of the die.
2. Out of the savings—
 - (a) a scholarship of Rs. 10 per month for ten months be awarded to a student who after having passed the B.A. examination of the University proceeds for the M.A. degree in History offering Ancient Indian History as one of his subjects. MUIR COLLEGE PRIZE FUND.

In March 1928 Rai Sahib S. C. Deb, Reader, Chemistry Department, made over to the University the amount of Rs. 517 being the balance left out of the old Muir College General Account Fund. This amount has been deposited with the Savings Bank, Katra, Allahabad, to form the nucleus of a 'Muir College Prize Fund'—the interest accruing therefrom to be utilized in awarding a prize preferably of books to the student of the University, who is declared by a majority of all the teachers of the University to be the "best-boy" of the session; the quality to be determined not entirely on academic grounds but on all the qualities that go to make a gentleman.

PROFESSOR DUNN MEDAL.

In April, 1930, Pandit Amarnatha Jha on behalf of the old students and Colleagues of Professor S. G. Dunn offered to the University the sum of Rs. 1,000 to be endowed for the award of a gold medal to the student who stands first in English in the B.A. Pass examination of the University. No. 38048.

299, OXFORD STREET, LONDON, W.

1st December, 1914.

DEAR SIR,

I HAVE to inform you that the application of your University for the recognition of its degrees of M.B. and B.S., together with the communications transmitted on the 10th of September and the 29th of October, were considered by the Executive Committee of this Council at its meeting on the 23rd ultimo, when the following resolution was adopted :—

Resolved :—“That the application of the University of Allahabad be acceded to, and that Registrar be authorised to place upon the *Colonial List of the Medical Register* any person who holds the degrees of M.B., B.S. of the University of Allahabad, provided that he satisfies the Registrar of the General Medical Council regarding the other particulars set forth in Part II of the *Medical Act*, 1886.”

I have accordingly added the degrees in question to the list of recognised degrees which entitle to registration in the Colonial List of the Medical Register of the United Kingdom.

You will notice the proviso that an applicant must satisfy me regarding the other particulars set forth in Part II of the Medical Act of 1886. One of these conditions is the production of evidence that the applicant is entitled by law to practise Medicine in the Country or Provinces in which he obtained his qualification. There is a Medical Ordinance in operation in Bombay and another in Madras, and I understand that an Ordinance is in contemplation in Bengal. I shall be glad if you would inform me which Presidency has jurisdiction over the United Provinces.

Yours faithfully,
A. J. COCKINGTON,
Acting Registrar.

B.—COLLEGES OF THE UNIVERSITY.

EWING CHRISTIAN COLLEGE, ALLAHABAD.

In October, 1846, the British East India Company made over its College work at Allahabad to the American Presbyterian Mission. When the Civil Station was removed from the Jumna in 1853, the Mission purchased the Court building for educational work and started a Collegiate School. After a few years College classes were given up and the institution was known as the Jumna Mission School or the A. P. Mission High School.

In 1900 the American Presbyterian Mission decided to re-open the College at Allahabad, and the First Class was formed in 1902. In order to keep School and College separate, the old Court building was torn down and a better home for the School was put up at the western end of the Jumna compound, leaving the eastern end free for the College. This now has the following buildings:—A main College building with a Laboratory for Biology, a Library (with more than ten thousand volumes), administrative offices, eleven lecture rooms and an Assembly Hall to seat 1,000; a Laboratory for Physics and one for Chemistry; an Infirmary; ten residences for members of the Staff; and five Hostels, providing accommodation for approximately 200. Four of the Hostels are arranged with suites of rooms for one or more unmarried Professors.

In 1923, as a result of the reconstruction of the University of Allahabad, the College gave up its B.A. and M.A. classes to the University and was resolved into two institutions: an Intermediate College, which took over classes IX and X from the High School, and an Internal or University College which provides Hostels (Rhea Hostel at the Jumna and Holland Hall near the University) and tutorial instruction for University students.

**KAYASTHA PATHSHALA UNIVERSITY COLLEGE,
ALLAHABAD,**

The Kayastha Pathshala was founded in 1873 by the late Munshi Kali Prasad of the Lucknow Bar. In 1878 it was raised to the Middle English standard and in 1888 to the Entrance standard of the Calcutta University. In 1895 it was affiliated up to the Intermediate standard of the Allahabad University, and in 1914, provisionally up to the B.A. In April, 1919, the College was permanently affiliated up to the B.A. standard. On the reorganisation of the Allahabad University, the Kayastha Pathshala was recognised as a College of the University in accordance

with section 2(a) of the Allahabad University Act of 1921.

The Institution was registered on August 2, 1893, under Act XXI of 1860. The chief controlling authority is the General Body of Trustees who elect a President every five years for the management of the institution.

The income of the College is derived partly from endowments, partly from fees and from Government grants.

The most important endowment is that of Mrs. Radhika Sinha, wife of Mr. S. Sinha, Bar.-at-Law, Patna, who gave Rs. 50,000 for the establishment of fellowships to be named Rai Kanhaiya Lal-Sewa Ram fellowships.

The College is built on a plot of land opposite the Senate House of the University, acquired on lease from Government in 1924. The foundation-stone of the new building was laid on 2nd June, 1924, and the College was opened formally by His Excellency Sir William Marris, Governor, United Provinces, on December 7, 1925. The College has accommodation for the residence of nearly 80 students and it offers tutorial and other supplementary instruction in the following subjects:—

SIR SUNDAR LAL LAW HOSTEL.

The Sir Sundar Lal Law Hostel was built in the year 1916, partly by means of a grant from the Government and partly from savings from the income of the University School of Law. It was intended to be a residence for Law Students and was so used up to the year 1922, when a certain number of under-graduates were admitted on the reconstitution of the University. The first Warden of the Hostel was Mr. R. K. Sorabji, Bar.-at-Law, Assistant Professor in the University School of Law. On his retirement the Principal of the University School of Law (Dr. J. C. Weir, Professor of Law in the University) became Warden; and acted as such up to 13th June 1930. In August 1930 the Hostel was divided into two separate Hostels, one of them has been named the Sir Sundar Lal Hostel and the other the Sir Pramada Charan Banerji Hostel. The Warden of the former Hostel is Mr. Salig Ram Bhargava and that of the latter Dr. M. U. S. Jung. The Superintendent of both the Hostels for the present is Mr. N. C. Chatterji. A second Superintendent will soon be appointed. Each Hostel has rooms for 107 students. Both the Hostels are maintained by the University.

MUIR HOSTEL.

(OLD GOVERNMENT HOSTEL.)

For a long time, the old Government Hostel was located in a bungalow within the Muir College compound on the spot where the University tank is now situated. The old bungalow collapsed and the new building was erected on the present site in 1912. In 1923 the name of the Hostel was changed from Government Hostel to Muir Hostel. The management of the Hostel is vested in the Superintendent, subject to the control of the Warden. There is now accommodation for 84 students. The Superintendent is assisted in his duties by Prefects chosen from among the hostellers.

The students' organisations comprise a Debating Society, a Library Committee and various sports clubs. The Hostel is maintained by the University.

THE NEW HOSTEL.

In order to meet the pressing demand for more hostel accommodation, the University decided to construct the New Hostel. The Government contributed Rs. 2,00,000 towards the cost of the Building and the balance has been met by the University.

The commemoration stone was laid by His Excellency Sir William Marris, Chancellor of the University, on 12th November, 1927. It has accommodation for 158 students—mostly in single-seated rooms. Mr. A. C. Banerji is Warden and Mr. S. G. Tewari Superintendent. The Hostel is maintained by the University.

MACDONNELL HINDU BOARDING HOUSE.

In order to meet the most pressing want of the Muir and other University Colleges for a Boarding House for Hindu students as expressed in the Report of the Director of Public Instruction of the United Provinces in 1895-96 and subsequently in the reports of the Principal of the then Muir Central College an appeal was made in 1900 by Pandit Madan Mohan Malaviya and the late Raja Jai Kishen Das Bahadur, C.S.I., Pandit Bishambhar Nath, Raja Madho Lal, Rai Nihal Chand Bahadur, Rai Sri Ram Bahadur, Rai Ramcharan Das Bahadur, and Sir Sundar Lal for funds to establish a Hindu Boarding House at Allahabad. Accordingly funds were collected and the foundation-stone of the Boarding House was laid by the then Lieutenant-Governor of the Provinces, Sir Antony MacDonnell. The main building and the Balrampore Hall with kitchens

and outhouses were erected in a couple of years and the opening ceremony was performed by the successor of Sir Antony MacDonnell, another Lieutenant-Governor, Sir James Digges LaTouche. The demand for more accommodation was so persistent that two wings had to be constructed in 1917. The MacDonnell Hindu Boarding House therefore now offers accommodation for 216 students. The institution is in charge of a registered association called "the MacDonnell University Hindu Boarding House Society" and is managed by a governing body and an Executive Committee of which the Chairman is Rai Bahadur Pandit Baldeoram Dave and Secretaries Munshi Iswar Saran, and Pandit A. P. Dube, B.C.L., Bar-at-law. H. H. the Maharaja of Benares is the President of the Society and Pandit Madan Mohan Malaviya is the Vice-President. The late Pandit Daya Narain Bajpai was the Superintendent of the Institution since it was established up to 1918. He was succeeded by Pandit Devi Prasad Shukla who is the present warden of the institution. Amongst the previous Secretaries may be mentioned such distinguished persons as Sir Sundarlal and Sir Tej Bahadur Sapru. The building has cost more than three lakhs of rupees. It is a very popular institution and during the last 30 years of its useful existence it has given accommodation to thousands of students who are now to be found in almost all the provinces of the country, occupying eminent positions.

MOHAMMEDAN BOARDING HOUSE, ALLAHABAD.

The idea of founding a boarding house for the Mohammedan students of the Muir Central College originated from the late Moulvi Samiulla Khan Bahadur, C.M.G., through whose exertions a small Committee was formed with the object of collecting funds and sufficient amount was raised to enable the Committee to apply to Government for the grant of a plot of land within the Muir Central College compound. The foundation was laid by His Honour Sir Auckland Colvin on the 11th of

March, 1890. At first twenty rooms were built and by the year 1898 ten more rooms and a large hall were added. Thus the first quadrangle which provided accommodation for thirty boarders was completed.

The number of Mohammedan students in the Muir Central College rose and it was found necessary to build another quadrangle. In 1906 Sir James LaTouche made a grant of Rs. 15,000. With this grant and the amount already in hand a new and larger Dining Hall and ten more rooms with necessary bath rooms, latrines, etc., of modern sanitary design were built.

The "Board of Trustees of Mohammedan Boarding House" was formed, new rules and regulations were made which were sanctioned by the Government and registered in accordance with Act XXI of 1860. Since 1913 Moulvi Syed Mohammad Ali Nami has been the Superintendent and Mr. Azizuddin Ahmad is the present Assistant Superintendent.

Her Highness Begam Sabiba of Bhopal visited the Institution in 1910 and His Honour Sir James Meston made grants of money amounting to Rs. 55,249. Her Highness the Begam of Bhopal made a donation of Rs. 9,000 and a recurring grant of Rs. 50 a month. Prince Hamidulla Khan made a donation of Rs. 5,000 for Boarding House Library. With the grant received from the U. P. Government and the donation from Bhopal State the total amount available was Rs. 65,600 out of which the rest of the building including the whole of the second quadrangle was built. It now provides accommodation for 100 students in addition to the quarters for Superintendent, Assistant Superintendent and other servants.

In 1920 Sir Harcourt Butler made a grant of Rs. 11,000 for equipping the building with electric light and fans.

Nawab Mozammilulla Khan Saheb paid Rs. 400 being half of the sum required for equipping the boarding house with a hospital, the other half being paid by the Government.

The Boarding House provides for all the indoor and outdoor games. There is a spacious hall for literary and debating society and a common room for the library which subscribes for several newspapers and periodicals.

Out of the above-mentioned donation of Rs. 50 per mensem by the Begam Sahiba of Bhopal a Dean has been appointed to conduct daily prayers in the Boarding House Prayer Hall. Monitorial System on improved lines has been introduced by the Board of Trustees.

The following gentlemen are the present office bearers :—

SUMEROHAND DIGAMBER JAINA HOSTEL.

The S. D. Jaina Hostel was founded in 1911 by Mrs. Sumerchand, a munificent Jaina lady of Allahabad, in memory of her husband. In 1913 the present building was purchased and in 1915 the Hostel was affiliated to the Allahabad University. On the re-organization of the University, the Jaina Hostel was recognised as a Hostel of the University in accordance with section 2(c) of the Allahabad University Act of 1921.

The Hostel Trust deed was executed in 1916 and the Institution registered on 3rd December, 1925, under Act XXI of 1860. The administration of the Hostel is in the hands of a Board of Management under the control of a Board of seven trustees. The expenses of the Hostel are met from the income of the endowment of property made by Mrs. Sumerchand.

The Hostel is a free institution, no fees for residence being charged. It is open to Jainas, as well as non-Jainas, preference being given to the former. It has a garden, an *Akhara*, a Library and a temple. Religious and moral training is its special feature.

The hostellers' chief organisation is the Jaina Brothers, Association which convenes literary meetings, manages indoor and outdoor games and also publishes a quarterly magazine.

A Physical training class has also been opened at the instance of Mr. Jai Krishna Chaube, City Scout Commissioner and the present "Physical Instructor and Scout master-in-Chief" of the Hostel.

QUESTION PAPERS.

B.A. AND B.Sc. EXAMINATIONS 1930.

ENGLISH.

ENGLISH (GENERAL).

FIRST PAPER.

(Essay.)

Time—Three hours.

Write an essay of about 700 words on *one* of the following subjects:—

- (1) The life of our day as a subject for poetry.
- (2) "The object of science is the advancement of human knowledge at any sacrifice of life."
- (3) Popular fallacies.
- (4) The reorganization of industries in India ; state the alternatives and examine their value.
- (5) "Film producing is an international industry and so far as its effects are of international concern, it should be subject to international control."
- (6) State regulation of books and newspapers in the interests of public morality.

SECOND PAPER.

Time—Three hours.

1. Explain clearly the central idea of the following passage and write notes on the expressions in italics:—

The mind that can grapple with original research, that can produce new thinking on old problems, must be trained from the first to face alone unpleasant, boring things. The real decisions of life whether they be the decisions of a boy or girl, a scientist, a judge, a soldier, a statesman, are made alone and with difficulty. A

spoon-fed generation is not fit to face solitary things, to gather material from every side, to co-ordinate it and announce a decision or a result. Whatever the faults of nineteenth-century education, it had not this fault. It was a century that produced great thinkers and the greatest scientists because the apparent harshness of the education, the curtness of the great text-books, necessarily made the student think and think hard for himself. Dr. Bond entirely approves of the method of modern times when it is really exercised—*of drawing things out of a scholar and not merely ramming knowledge into him*. The earnest student merits more sympathy than he had in many schools of earlier days, though those days were not lacking in great and sympathetic teachers who *discerned ability and genius and gave it play*. But these great teachers, and especially at the Universities of Oxford and Cambridge, did not spoon-feed their pupils. They realised that interference in intellectual processes was essential, the setting of the pupil on lines of thought that he could never have found for himself, but they did not attempt to make the road easy in the sense of removing or belittling the *obstacles that every one must remove for himself with infinite agony of mind and spirit*. There is no royal high road to the unknown. Each boy and girl, if it is to be a real road to a real goal, makes it for himself or herself, once the direction is given and the mind and spirit have been *orientated by the interference of the teacher*.

2. Write *short* essays on two of the following subjects:—

A.

- (1) Science and Religion.
- (2) The Character of Mr. Collins.
- (3) The Choice of Books.
- (4) The Contribution of Greece to Dramatic Literature.
- (5) The Essentials of Poetry.

B.

- (1) "The fairy-tales of Science."
- (2) The Character of Eustacia.
- (3) The Achievements of the Eighteenth Century.
- (4) The Contribution of Buddhism to Indian Civilisation.
- (5) Lessing's *Laocoon*.

B.A. EXAMINATION.**ENGLISH.****SPECIAL SECTION.****FIRST PAPER.***Time —Three hours.*

1. Explain with reference to the context *any three* of the following :—

(a) He that a fool doth very wisely hit
 Doth very foolishly, although he smart,
 Not to seem senseless of the bob : if not,
 'The wise man's folly is anatomised
 Even by the squandering glances of the fool.

(b) I'll graff it with you, and then I shall graff it
 with a medlar: then it will be the earliest fruit i' the
 country; for you'll be rotten ere you be half ripe, and
 that's the right virtue of the medlar.

(c) My better parts
 Are all thrown down, and that which here
 stands up
 Is but a quintain, a mere lifeless block.

(d) Ay, of a snail; for though he comes slowly, he
 carries his house on his head; a better jointure, I think,
 than you make a woman: besides he brings his destiny
 with him.

2. Explain and write notes on *any two* of the following :—

(a) If it were done when 'tis done, then 'twere well
 It were done quickly: if the assassination
 Could trammel up the consequence, and catch
 With his surcease success; that but this blow
 Might be the be-all and the end-all here,
 But here, upon this bank and shoal of time,
 We'd jump the life to come.

(b) We have scotched the snake, not kill'd it:
 She'll close and be herself, whilst our poor
 malice
 Remains in danger of her former tooth.

But let the frame of things disjoint, both the
worlds suffer.

Ere we will eat our meal in fear and sleep
In the affliction of these terrible dreams
That shake us nightly.

- (c) A good and virtuous nature may recoil
In an imperial charge. But I shall crave your
pardon;
That which you are my thoughts cannot trans-
pose:
Angels are bright still, though the brightest
fell:
Though all things foul would wear the brows
of grace,
Yet grace must still look so.

- (d) Come, seeling night,
Scarf up the tender eye of pitiful day,
And with thy bloody and invisible hand
Cancel and tear to pieces that great bond
Which keeps me pale.

3. Analyse the character of Lady Macbeth and show that she fulfils an important purpose at the beginning of the play and fitly disappears, almost without notice, towards the end.

Or,

Discuss the opinion that *Macbeth* is a tragedy of the imagination.

4 Compare *As You Like It* as a comedy with *A Midsummer Night's Dream*.

Or,

Compare the tragic idea in *Macbeth* with that in *Hamlet* or *Othello*.

5. Consider how far Shakespeare was influenced in his work by stage-conditions.

Or,

Write a short note on Shakespeare's treatment of fairies in *A Midsummer Night's Dream* and of witches in *Macbeth*.

6. What influences, internal and external, combined to make 1601 a turning point in Shakespeare's artistic career?

Or,

Explain and illustrate Shakespeare's method of handling historical material for purposes of his plays.

SECOND PAPER.

Time—Three hours.

[Question 1 and 2 are compulsory. Answer **any three** other questions.]

1. Explain, noting all points of difficulty, *three* of the following:—

- (a) Now at the last gasp of love's latest breath,
When, his pulse failing, passion speechless lies,
When faith is kneeling by his bed of death,
And innocence is closing up his eyes,
—Now if thou would'st, when all have given
him over
From death to life thou might'st him yet
recover!
- (b) Nor second He, that rode sublime
Upon the seraph-wings of Ecstasy,
The secrets of the Abyss to spy;
He pass'd the flaming bounds of Place and
Time:
The living Throne, the sapphire-blaze,
Where Angels tremble while they gaze,
He saw; but blasted with excess of light,
Closed his eyes in endless night.
- (c) Then felt I like some watcher of the skies
When a new planet swims into his ken;
Or like stout Cortez, when with eagle eyes
He stared at the Pacific—and all his men
Look'd at each other with a wild surmise—
Silent, upon a peak in Darien.
- (d) Make me thy lyre, even as the forest is:
What if my leaves are falling like its own!
The tumult of thy mighty harmonies

Will take from both a deep, autumnal tone,
Sweet though in sadness. Be thou, Spirit fierce
My spirit! Be thou me, impetuous one!

- (e) I wish that somewhere in the ruin'd folds,
Among the fragments tumbled from the glens
Or the dry thickets, I could meet with her,
The Abominable, that uninvited came.
Into the fair Peleian banquet-hall,
And cast the golden fruit upon the board
And bred this change.

- (f) Life piled on life
Were all too little, and of one to me
Little remain : but every hour is saved
From that eternal silence, something more,
A bringer of new things ; and vile it were
For some three suns to store and hoard myself

2. Explain, with reference to the context, *two* of the following:—

- (a) Strange friend, past, present, and to be
Loved deeper, darker understood ;
Behold, I dream a dream of good,
And mingle all the world with thee.
- (b) Let me go : take back thy gift :
Why should a man desire in any way
To vary from the kindly race of men,
Or pass beyond the goal of ordinance
Where all should pause, as is most meet for all ?
- (c) And oft, when in my heart was heard
Thy timely mandate, I deferr'd
The task, in smoother walks to stray ;
But thee I now would serve more strictly, if
I may.
- (d) Thy soul was like a Star, and dwelt apart
Thou hadst a voice whose sound was like the sea
Pure as the naked heavens, majestic, free ;
So didst thou travel on life's common way
In cheerful godliness.
- (e) We look before and after,
And pine for what is not :
Our sincerest laughter
With some pain is fraught
Our sweetest songs are those that tell of
saddest thought.

(f) For thence—a paradox
Which comforts while it mocks,
Shall life succeed in that it seems to fail :
What I aspired to be,
And was not, comforts me ;
A brute I might have been, but would not
sinki ' the scale.

3. What are the main characteristics of Tennyson's poetry ? Does he succeed in giving complete expression to the ideals of his time ?

4. Write a note on Shelley as a lyrist.

5. Compare the attitudes of Wordsworth, Shelley, and Tennyson to Nature.

6. Trace the development of the central idea in *two* of the following:—

The Ode to the West Wind ; Ulysses ; Rabbi Ben Ezra ; The " Lucy " poems.

7. Illustrate the development of (1) the Ode, (2) the Sonnet in English poetry.

8. " Wordsworth has no assured poetic style of his own. When he seeks to have a style he falls into ponderosity and pomposity." (*Arnold*.) Discuss.

THIRD PAPER.

Time—Three hours.

[Answer questions 1 and 2 and three others ; only one to be selected from each of the Sections A, B, and C. All questions carry equal marks.]

1. Explain *two* of the following, writing notes on all points of interest:—

(a) A happy man or woman is a better thing to find than a five-pound note. He or she is a radiating focus of good will ; and their entrance into a room is as though another candle had been lighted. We need not care whether they could prove the forty-seventh proposition ; they do a better thing than that, they practically demonstrate the great theorem of the Liveableness of Life.

(b) There is only one difference between a long life and a good dinner: that, in the dinner, the sweets come last.

(c) The dispassionate gravity, the noble forgetfulness of self, the tenderness of others, that are there expressed and were practised on so great a scale in the life of its writer, make this book a book quite by itself.

2. Explain, with reference to the context, *any three* of the following:—

(a) In a world which exist by the balance of Antagonisms, the respective merit of the Conservator and the Innovator must ever remain debatable. Great in the meanwhile, and undoubted for both sides, is the merit of him who, in a day of change, walks wisely, honestly.

(b) Prudence is the highest virtue he can inculcate; and for that finer portion of our nature, that portion of it which belongs essentially to Literature strictly so called, where our highest feelings, our best joys and keenest sorrows, our Doubt, our Love, our Religion reside, he has no word to utter.

(c) An illiterate encounter with a porter's knot, or a bread basket, would have quickly put to flight all the theology I am master of, and have left me worse than indifferent to the five points.

(d) "You are like the German burghers" says he, "and the princes are the mozelle; when our army came to a halt, they always sent a deputation to compliment the chief, and fired a salute with all their artillery from their walls."

(e) "I may have been in Pekin", says he, "or I may have been in Paraguay—who knows where? I am now Captain Von Holtz, in the service of His Electoral Highness come to negotiate exchange of prisoners with His Highness of Savoy."

(f) But to be content with death may be better than to desire it; a miserable life may make us wish for death, but a virtuous one to rest in it, which is the advantage of those resolved Christians, who looking on death not only as the sting, but the period and end of sin,

the horizon and isthmus between this life and a better, and the death of this world but as a nativity of another, do contentedly submit unto the common necessity.

A.

3. "Esmond has rightly taken its place, not only as its author's masterpiece, but as a book to be ranked with the greatest works of historical fiction produced in any age or in any country." Discuss.

4. Sketch the character of either (a) Harry Esmond, or (b) Beatrix.

B.

5. Write a note on the prose style of Stevenson

6. What estimate of Stevenson's character do you form by reading his Essays?

1. Translate the following into Sanskrit :—

On one occasion the sage Bhṛigu was sent to test the character of the three great gods. He first went to Brahma and purposely omitted an obeisance. Upon this, the god reprehended him severely, but was pacified by apologies. Next, he entered the abode of Śiva in Kailāśa, and omitted, as before, all tokens of adoration. The vindictive deity was enraged and would have destroyed him had he not conciliated him by mild words. Lastly, he went to Viṣṇu, and finding him asleep he boldly gave the god a kick on his breast which at once awoke him. Instead of showing anger, however, the god arose, and, on seeing Bhṛigu, inquired tenderly whether his foot was hurt, and then began to rub it gently. 'This,' said Bhṛigu, 'is the mightiest god. He overtops all by the most potent of all weapons—kindness and generosity.'

2. Translate the following into Arabic:—

(a) Our knowledge of the ancient history of Arabia is derived chiefly from the Koran, which contains much of the old folklore of the country, and from the traditions which the Arabs at all times were in the habit of handing down from father to son. These traditions were collected with great care and industry by the Arab historians of the eight and succeeding centuries of the Christian era. The inscriptions which have been discovered in the south of Yemen, so far as they have been deciphered, largely verify our knowledge of the past as derived from the Koran and the traditions.

(b) In the sixth year of the Hegira, the Prophet granted to the monks of the monastery of St. Catherine, near Mount Senai, and to all Christians a Charter, which is a monument of enlightened tolerance. By it the Prophet secured to the Christians important privileges and immunities and the Moslems were prohibited under severe penalties from violating and abusing what was therein ordered. In this Charter the Prophet undertook himself, and enjoined on his followers, to protect the Christians, to guard them from all injuries, and to defend their churches and the residences of their priests.

THIRD PAPER.

Time—Three hours.

1. Translate the following into Persian :—

(a) " But now in this age, which is the cream of all the ages and the crown of all times, the nature of the leaders of mankind has been sublimated, and great and powerful thinkers have appeared who have concentrated their luminous thoughts and salutary meditations on all matters appertaining to this life and the next, and in their clear vision the ancient laws and practices appeared contemptible and unsubstantial. Moreover, by the lapse of ages and passage of time, most of these rules had become obsolete, and the observance of these ethical principles and practices proved burdensome to the powerful minds and luminous intellects of these people. Therefore, they manfully trampled under foot these principles and practices, adopted instead, for their guidance in this life and the next, the method now current amongst the great and the noble; and based on it their conduct of the affairs of this world and the next. "

(b) " To Sultan Veled, " he says, " belongs not only the honour due to the pioneer in every good work, but the credit which is justly his who successfully accomplishes an arduous enterprise. To have inaugurated the poetry of a nation is an achievement of which any man might be proud. " Thus even so great an admirer of Turkish poetry as Gibb is constrained to admit that it chiefly owes its inception to a Persian, and is in fact, in a sense, a branch of Persian poetry, to which for five centuries and a half (A.D. 1300—1850) it owed its inspiration.

کلام اول سے آخر تک حسن و لطافت کے اعلیٰ درجہ

ہے کہ اس کا عام کلام ہموار اور اصول کے موافق
ہو اور کہیں کہیں اس میں ایسا حیرت انگیز جلوہ
نظر آئے جس سے شاعر کا کمال خاص و عام کے دلوں

کے عام اشعار بھی خاص خاص اشخاص کے دل

THIRD PAPER.

Time—Three hours.

1. Translate the following passage into idiomatic Urdu prose :—

The literature of India passes generally for the most ancient literature of which we possess written records, and justly so. But the reasons which have hitherto been thought sufficient to establish this fact are not the correct ones; and it is indeed a matter for wonder that people should have been so long contented with them. In the first place, Indian tradition itself has been adduced in support of this fact, and for a very long time this was considered sufficient. In the next place, astronomical data have been appealed to, according to which the Vedas would date from about 1400 B.C. Further, one of the Buddhist eras has been relied upon, according to which a reformer is supposed to have arisen in the sixth century B.C. in opposition to the Brahmanical hierarchy.

2. Translate into Urdu :—

THIRD PAPER.

Time—Three hours.

1. Translate into Hindi *either (a) or (b)* :—

(a) The story of the rise, decline, and fall of States and the political lessons conveyed have never been more finely, more intelligently, expressed than by the great Greek historians. To-day there is a tendency to regard the political experience of the Greek States as of little use to modern nations because (1) they were small in extent and population, and (2) much of the hard, joyless work was done by slave labour. But a laboratory experiment, though on a very small scale, may give most helpful information to those engaged in large operations, and the slaves in ancient communities may be taken as mechanical persons performing the functions of modern machinery.

(b) In the far north-west of India is a wild and mountainous region of which modern Europeans have

but fragmentary cognisance. This is the district of the Swat, with its fertile valley and frowning peaks, a storm-centre for the intermittent warfare of rival Pathan clans. It is a field rich in historical memories, not only of those risings and campaigns still within our own recollection but of old-time Buddhist sanctity in the centuries immediately before and after Christ, which attracted many famous pilgrims from far-off China itself. But in addition here was the scene of a famous exploit of Alexander the Great on his way to the triumphant invasion of the Punjab in the fourth century.

2. Translate *one* of the following stanzas into Hindi :—

(a) विधौ विरुद्धे न पयः पयोनिधौ,
 सुधौ घसिन्धौ न सुधा सुधाकरे ।
 न वाञ्छितं सिध्यति कल्पपादपे,
 न हेम हेमप्रभवे गिरावपि ॥

(b) सुतं पतन्तं प्रसमीक्ष्य पावके,
 न बोधयामास पतिं पतिव्रता ।
 तदा भवत्तत्पतिः स्किगौरवा-
 द्भुताशनश्चन्दनपङ्कशीतलः ॥

3. Write an essay in Hindi containing about one thousand words on *one* of the following subjects :—

- (1) "More things are wrought by prayer
 Than this world dreams of."
- (2) Non-violence as the political creed of a nation.
- (3) भय बिनु भाव न ऊपजै भय बिनु होय न प्रीति ।
 जब हिरदे से भय गया मिटो सजल रस रीति ॥

(4) Hindi as medium of instruction for University studies.

distributed over the area, find the couple necessary to turn the cylinder about its axis while the pressure is maintained.

2. Find the necessary and sufficient conditions for the equilibrium of a rigid body under the action of forces in one plane. A string is fastened to the vertex and to a point on the circumference of the circular base of a right circular cone, and is then put over a smooth peg. If the cone rests with its axis horizontal, prove that the length of the string must be $\sqrt{h^2 + 4r^2}$, where h is the height and r the radius of the base of the cone.

3. State and prove the principle of Virtual work for any system of forces in one plane.

Two equal and uniform rods AB and AC , each of length $2b$, are freely jointed at A and rest on a smooth vertical circle of radius a . If 2θ be the inclination between them, show that

$$b \sin^3 \theta = a \cos \theta.$$

4. If the ordinates of a given curve u be all diminished or increased in a given ratio and a new curve, u' , thus formed, prove that the centroid of any portion of u' cut off by a straight line is obtained by diminishing or increasing in the same ratio the ordinate of the centroid of the corresponding portion of u .

Hence, if a straight line cuts off a constant area from an ellipse, find the locus of the centroid of the area cut off.

5. Find the path of a projectile in vacuum under the action of gravity alone. A particle is projected at elevation α , and after t seconds it appears to have elevation β as seen from the point of projection. Prove that its initial velocity was

are in the ratio $m_1 : m_2$. The fragments continue to move in the original line of motion of the shell. Shew that their velocities are

$$V + \sqrt{\frac{2m_2 E}{m_1 M}} \text{ and } V - \sqrt{\frac{2m_1 E}{m_2 M}}.$$

7. Find the loss of kinetic energy when two bodies moving with different velocities impinge obliquely.

Two particles are let drop from the cusp of a cycloid down the curve at an interval of time t ; prove that they will meet at a time.

A horizontal trough is semi-circular in section and is filled with water whose weight is W ; if the trough be imagined to be divided into halves along the middle, shew that the water will tend to push them as under

horizontally with a force $\frac{W}{\pi}$.

Shew also that the resultant thrust of the water on either half of the trough makes with the vertical an angle.

$$\cot^{-1} \left(\frac{\pi}{2} \right).$$

10. Find the necessary and sufficient condition for the equilibrium of a floating body.

A right circular cone, of density ρ , floats just immersed with its vertex downwards in a vessel containing two liquids of densities σ_1 and σ_2 respectively; show

that the plane of separation of the two liquids cuts off from the axis of the cone a fraction,

$$\frac{\sqrt{\rho - \sigma_2}}{\sqrt{\sigma_1 - \sigma_2}} \text{ of its length.}$$

11. Shew how to find the centre of pressure of a plane lamina immersed vertically in a homogeneous fluid. Find the centre of pressure of a square lamina held with its diagonal vertically beneath water and a corner in the surface.

B.A. (HONOURS) SECOND YEAR EXAMINATION 1930.

ENGLISH.

FIRST PAPER.

Time—Three hours.

[Answer Questions 1 and 8 and any three of the rest.]

1. Criticise the style and subject-matter of three of the following passages :—

(a) Before calamity she is a tigress ; she rends her woes, shivers them in compulsed abhorrence. Pain, for her, has no result in good ; tears water no harvest of wisdom ; on sickness, on death itself, she looks with the eye of a rebel. Wicked, perhaps, she is, but also she is strong ; and her strength has conquered beauty, has overcome grace, and bound both at her side, captives peerlessly fair, and docile as fair. Even in the uttermost frenzy of energy is each man's movement royally, imperially, incedingly upborne. Her hair, flying loose in revel or war, is still an angel's hair, and glorious under a halo. Fallen, insurgent, banished, she remembers the heaven where she rebelled. Heaven's light, following her exile, pierces its confines, and discloses their forlorn remoteness.

(Charlotte Brontë.)

(b) You Nightingales, that came so far,
 From Afric's shore ;
 With these rich notes, unloaded now
 Against my door ;
 Most true they are far richer freight
 Than ships can hold ;
 That come from there with ivory tusks
 And pearls, and gold.
 But you'll return more rich, sweet birds
 By many notes ;
 When you take my Love's sweeter ones
 Back in your throats,
 And Afric's coast will be enriched
 By how you sing !

What! you'll bring others back with you,
To learn—next Spring.

(*W. H. Davies.*)

(c) In after days when grasses high
Overtop the stone where I shall lie,
Though ill or well the world adjust
My slender claim to honour'd dust,
I shall not question nor reply.

I shall not see the morning sky ;
I shall not hear the night wind sigh ;
I shall be mute as all men must

In after days !

But yet, now living, fain would I
That someone then should testify,
Saying—' He held his pen in trust
To Art, not serving shame or lust.'
Will none?—Then let my memory die
In after days !

(*Austin Dobson.*)

(d) I do not suppose that your troops are to be beaten in actual conflict with the foe, or that they will be driven into the sea ; but I am certain that many homes in England in which there now exists a fond hope that the distant one may return—many such homes may be rendered desolate when the next mail shall arrive. The angel of death has been abroad throughout the land ; you may almost hear the beating of his wings. There is no one, as when the first-born were slain of old, to sprinkle with blood the lintel and the two side-posts of our doors, that he may spare and pass on ; he takes his victims from the castle of the noble, the mansion of the wealthy, and the cottage of the poor and the lowly.

1. Comment on *any four* of the following extracts, if possible, naming the poems from which they are chosen :—

- (i) I dimly see
My far-off doubtful purpose, as a mother
Conjectures of the features of her child
Ere it is born : her child !—a shudder comes
Across me : never child be born of me,
Unblest, to vex me with his father's eyes !
- (ii) What is that will last ?
All things are taken from us, and become
Portions and parcels of the dreadful Past.
Let us alone. What pleasure can we have
To war with evil ? Is there any peace
In ever climbing up the climbing wave ?
All things have rest, and ripen toward the
grave.
In silence ; ripen, fall and cease :
Give us long rest or death, dark death or
dreamful ease.
- (iii) Comfort ? comfort scorn'd of devils ! this is
truth the poet sings,
That a sorrow's crown of sorrow is remembering
happier things.
- (iv) He clasps the crag with crooked hands ;
Close to the sun in lonely lands,
Ring'd with the azure world he stands.
- (v) We pass ; the path that each man trod
Is dim, or will be dim, with weeds :
What fame is left for human deeds
In endless age ? It rests with God.
- (vi) 'The dusky strand of Death inwoven here
With dear Love's tie, makes Love himself
more dear.'

- (vii)Here, thro' the feeble twilight of this
world
Groping, how many, until we pass and reach
That other, where we see as we are seen !
- (viii)but now
The shackles of an old love straiten'd him,
His honour rooted in dishonour stood,
And faith unfaithful kept him falsely true.
- (ix) Love wraps his wings on either side the heart,
Constraining it with kisses close and warm,
Absorbing all the incense of sweet thoughts
So that they pass not to the shrine of sound.
- (x) ...Dower'd with the hate of hate, the scorn of
scorn
The Love of Love.....
- (xi) What are men that He should heed us ?
cried the king of sacred song ;
Insects of an hour, that hourly work their
brother insect wrong,
While the silent Heavens roll, and Suns
along their fiery way,
All their planets whirling round them, flash
a million miles a day.
- (xii) Her loveliness with shame and with surprise
Froze my swift speech ; she turning on my
face
The star-like sorrows of immortal eyes,
Spoke slowly in her place,

N.B.—Question 1 and any other four questions to be attempted.

1. Comment on any three of the following :—

(a) 'Notwithstanding his (Akbar's) kingship, and his treasures, and his buried wealth, which were beyond the scope of counting and imagination, his fighting elephants and Arab horses, he never by a hair's breadth placed his foot beyond the base of humility before the throne of God, but considered himself the lowest of created beings and never for one moment forgot God. The professors of various faiths had room in the broad expanse of his incomparable sway. This was different from the practice in other realms, for in Persia, there is room for Shias only, and in Turkey, India, and Tūrān, there is room for Sunnis only.' (*Tuzuk-i-Jehangiri*.)

(b) 'Yet, amidst such complicated evils, the fortitude of Pertap remained unshaken, and a spy sent by Akbar represented the Rajpoot and his chiefs seated at a scanty meal, maintaining all the etiquette observed in prosperity, the Rana, bestowing the *doonah* to the most deserving, and which, though only of the wild fruit of the country, was received with all the reverence of better days. Such inflexible magnanimity touched the soul of Akbar, and extorted the homage of every chief in Rajasthan; nor could those who swelled the gorgeous train of the Emperor withhold their admiration.' (*Tod's Rajasthan*.)

(c) 'Though the lightening of the burden of sorrow is always an adornment of those admitted to the

august assemblage, and the speech and action of His Majesty (Akbar) form the stock of State and Religion, yet a fresh announcement was made that it had occurred to His Majesty that everyone who had the bliss of attending court should, according to the number of his years, give one *dām* or one rupi or one *muhr* to some good object, so that by that means, a well, or a reservoir, or a caravanserai, or a garden might be constructed, and that thereby every kind of distress might be relieved and there might be a spiritual and temporal growth.' (*Akbarnama*.)

(d) "Wilton Oldham is right in affirming that 'Akbar's revenue system was ryotwaree' and that 'the actual cultivators of the soil were the persons responsible for the annual payment of the fixed revenue.' The Settlement was not made either with farmers of the revenue,.....or with the headmen of villages....Many passages in the *Āin* prove the correctness of Oldham's proposition." (*V. Smith's Akbar*.)

(e) 'Forman of Zelabdin Mahemet Echebar Reverend Fathers of the Order of Saint Paul: Be it known to you that holding you in great esteem, I am sending you my ambassador Ebadola and his interpreter..to beg you to send to me two Fathers, learned in the Scriptures, who shall bring with them the principal books of the law, and of the Gospels.... Know, also that the Fathers who shall come here will be received by me with all honour, and that it will be a peculiar pleasure to me to see them. If, after I have been instructed as I desire in their law and its perfection, they wish to return, they will be free to do so whenever it shall seem good to them, and I shall despatch them with great respect and honour.' (*Du Jarric*.)

(f) 'News came,....that Munim Khan *Khān Khānān* made the inhabitants migrate to Gaur and ordered that that town.....should be inhabited: and all that the Amirs could say against it availed nothing....Various diseases, the names of which would be difficult to know, attacked their constitution....things came to such a pass that the living were unable to bury the dead, and threw them into the river.... And on account of the arrogance of his disposition, no one had the power to remove the cotton wool of ignorance from his ears and make him leave the place... After a time, the constitution of the *Khān Khānān* began to deviate from its usual

course of equilibrium, and at over eighty years of age... he rendered his account to the Guardian of Paradise, or to the Guardian of Hell (God knows)... Since he had no heirs, the officials seized all that wealth and gain for the imperial treasury.' (*Al Badaoni*.)

2. Discuss the incidents that led up to Bairam Khan's dismissal, and Akbar's assumption of power, and show how far the *Khān Khānān's* removal was conducive to the welfare of the kingdom.

3. 'Akbar's greatest troubles were caused by his own relations and countrymen.' Give an account of these troubles, and the measures taken by Akbar to overcome them.

The truth is that secondary impressions, impressions gathered from books and from maps, are valuable as adjuncts to primary impressions (that is, impressions gathered through the channel of our senses), or, what is always almost as good and sometimes better, the interpreting voice of the living man. For you must allow me the paradox, that in some mysterious way the voice and gesture of a living witness always convey something of the real impression he has had, and sometimes convey more than we should have received ourselves from our own sight and hearing of the thing related.

Well, I say, these secondary impressions are valuable as adjuncts to primary impressions. But when they stand absolute and have hardly any reference to primary impressions, then they may deceive. When they stand not only absolute but clothed with authority, and when they pretend to convince us even against our own experience, they are positively undoing the work which education was meant to do. When we receive them merely as an enlargement of what we know, and make of the unseen things of which we read things in the image of the seen, then they quite distort our appreciation of the world.

B. COM. (PART II) EXAMINATION.**ENGLISH.****FIRST PAPER.***Time—Three hours.*

1. "Splendid indeed have been and still remain the great ideals which mankind has *collectively striven for* and, by striving for, has enabled to be formulated and to enter the hearts and *become fabric of the conscience of all noble individuals*. By crowd-forming ideals the lower masses of mankind have been and are being elevated, and by them only. The masses of humanity are not to be raised by intellectual effort, nor by science, nor by the labour of individuals; they *can be elevated by the infection of fine ideals only*, and to these and the crowds that have incorporated them *the great advance from the beast-level to where we stand* has been due. But in the heritage of the world no less precious are the noble lives, the high intellectual accomplishments, the great works, and the splendid deeds of individual men; and they, not those only who have occupied high public position and *loomed large within the vision of their contemporaries*, but still more the forgotten multitudes of separate and variously gifted individuals, *who have followed each his own star*, who have lived and laboured each under the guidance of his own reason, who have faced the world with fearless confidence, each in his own resources and powers, and who in art, in literature, in philosophy, in scientific discovery, in courageous action, or in masterful direction, have shown how beneficent may be the life of an independent human unit in effecting great results, which no crowd could either conceive or bring to fruition. Great is Mankind, but great also is Man."

(a) Explain the portions italicised in this passage

(b) State briefly in your own words what, according to the writer, are the two factors in the progress of civilization.

- (a) Choice of trade marks and trade names.
- (b) Stimulation of the will to buy.
- (c) Effect of increased output on employment.
- (d) The doctrine of *laissez-faire*.

3. "Man is of all kinds of baggage the most difficult to be moved. Economists, especially the earlier economists, were apt to be heedless of this fact. Man is classified as "labour," and that is represented as "flowing" where there is a demand for labour. Even now, when railways have made it comparatively easy and cheap to go from end to end of the country, and when newspapers give abundant information as to where labour is wanted, how hardly, slowly, reluctantly does labour "flow"! It is the *viscous, tardy* movement of lava rather than the mobile dash of water. "Labour" is the aggregation of labourers, but in most cases *the labourer is not a unit*. He is married and has a family to hinder his movements. If he has grown-up sons and daughters, they have occupations which they will have no wish to desert because the head of the family finds work slack near home, and thinks he could do better elsewhere. If he goes, either the home must be broken up or their employment sacrificed. Friends, associations, and *that innate dislike of change* which grows stronger as age advances, all combine to reduce labour to creeping rather than flowing."

 The fairest of her sex, Angelica
 His daughter, sought by many prowrest
 knights,
 Both Paynim, and the peers of Charlemane.

- (b) For when thy folding-star arising shows
 His paly circlet, at his warning lamp
 The fragrant Hours and Elves
 Who slept in buds the day,
 And many a Nymph who wreathes her brows
 with sedge
 And sheds the freshening dew, and lovelier
 still
 The pensive Pleasures sweet,
 Prepare thy shadowy car.

- (c) This silence for my sin you did impute,
 Which shall be most my glory, being dumb;
 For I impair not beauty being mute,
 When others would give life and bring a

 And that was moost of synne and harlotries.
 Wel koude he stelen corn and tollen thries—
 And yet he hadde a thombe of gold, pardee!

- (e) The fugitive bond-woman, with her son,
 Outcast Nebaioth, yet found here relief
 By a providing angel; all the race
 Of Israel here had famished had not God
 Rained from heaven manna; and that pro-
 phet hold,
 Native of Thebez, wandering here, was fed
 Twice by a voice inviting him to eat.

- (f) For having yet in his deducted spright
 Some sparks remaining of that heavenly fyre,
 He is enlumind with that goodly light,
 Vnto like goodly semblant to aspyre:
 Therefore in choice of love, he doth desyre
 That seemes on earth most heavenly, to
 embrace.
 That same is Beautie, borne of heavenly race.

 (rawls to maturity, wherewith being

Crooked eclipses 'gainst his glory fight,
And Time that gave doth now his gift
confound.

That he had lerned out of som decree,—
No wonder is, he herde it al the day,

FOURTH PAPER.

Time—Three hours.

[Answer Question 1 and four others. Question 1 carries 36 marks]

1. Explain, with reference to the context, any six of the following passages:—

(a) When I read an epigram of Martial, the first line recalls the whole; and I have no pleasure in repeating to myself what I know already. But each line, each word in Catullus, has its merit; and I am never tired with the perusal of him.

(b) In the civilised world the most numerous class is condemned to ignorance and poverty; and the double fortune of my birth in a free and enlightened country, in an honourable and wealthy family, is the lucky chance of an unit against millions.

(c) But whether it were the ancient Athenians that had the glory of the repulse and the resistance of those forces, I can say nothing; but certain it is, there never came back either ship or man from that voyage.

(d) There has not been a law-suit in the parish since he has lived among them; if any dispute arises, they apply themselves to him for the decision; if they do not

acquiesce in his judgment, which I think never happened above once or twice at most, they appeal to me.

(e) He was clothed in a robe of fine black cloth, with wide sleeves and a cape: his under-garment was of excellent white linen down to the foot, girt with a girdle of the same, and a sindon or tippet of the same about his neck.

(f) The shelves of their library groan under the weight of the benedictive folios, of the editions of the fathers, and the collections of the Middle Ages, which have issued from the single Abbey of St. Germaine de Prez at Paris.

(g) If it be considered as a poem political and controversial, it will be found to comprise all the excellences of which the subject is susceptible; acrimony of censure, elegance of praise, artful delineation of characters, variety and vigour of sentiment, happy turns of language, and pleasing harmony of numbers; and all these raised to such a height as can scarcely be found in any other English composition.

(h) In this poem there is no nature, for there is no truth; there is no art, for there is nothing new. Its form is that of a pastoral, easy, vulgar and therefore disgusting: whatever images it can supply are long ago exhausted; and its inherent improbability always forces dissatisfaction on the mind.

(i) But what can one do, or how dispense with these darker disquisitions or moonlight voyages, when we have to deal with a sort of moon-blind wits who, though very acute and able in their kind, may be said to renounce daylight, and extinguish in a manner the bright visible outward world, by allowing us to know nothing beside what we can prove by strict and formal demonstration.

2. Give a short account of the character-writers in the seventeenth century.

3. "For sensible men the world offers no better reading than *The Lives of the Poets*. They afford an admirable example of the manner of man Johnson was." Illustrate Birrell's statement

4 "Had Dr. Johnson written his own life" said Boswell, "the world would probably have had the most perfect example of biography that was ever exhibited." Discuss.

(g) He, most humane
 And fille'd with honour, to my kingly guest
 Unclasp'd my practice, quit his fortunes here,
 Which you knew great, and to the hazard
 Of all incertainties himself commended,
 No richer than his honour : how he glisters
 Thorough my rust ! and how his piety
 Does my deeds make the blacker !

(h) You see, sweet maid, we marry
 A gentler scion to the wildest stock,
 And make conceive a bark of baser kind
 By bud of nobler race : this is an art
 Which does mend nature, change it rather,
 but

The art itself is nature.

2. "Shakespeare's poetry is characterless ; that is, it does not reflect the individual Shakespeare." (*Cole-ridge*.) Discuss.

3. Write a note on the Chronicle-play in Shakespeare's time, and point out the advance made by "Richard II" in the direction of the History-play.

Or,

Write a note on Shakespeare's use of Historical material in drama.

4. Dr. Johnson criticises Shakespeare in the following words : " He sacrifices virtue to convenience, and is so much more careful to please than to instruct, that he seems to write without any moral purpose." Comment.

5. What use does Shakespeare make of songs and lyrics in his plays ? Illustrate.

6. Discuss the charge made against Shakespeare that his plots are weak.

SIXTH PAPER.

*Time—Three hours.***N.B.—Answer Question 1 and any four of the others.***Question 1 carries 40 marks.*

1. Explain with reference to the context *any five* of the following passages, showing what characteristics of the poet each illustrates :—

- (a) One function, above all, of such a mind
 Had Nature shadowed there, by putting forth,
 'Mid circumstances awful and sublime,
 That mutual domination which she loves
 To exert upon the face of outward things,
 So moulded, joined, abstracted, so endowed
 With interchangeable supremacy,
 That men, least sensitive, see, hear perceive,
 And cannot choose but feel.
- (b) Where are the songs of Spring ? Ay, where
 are they ?
 Think not of them, thou hast thy music too,
 While barred clouds bloom the soft-dying day,
 And touch the stubble-plains with rosy hue ;
 Then in a wailful choir the small gnats mourn
 Among the river shallows, borne aloft
 Or sinking as the light wind lives or dies ;
- (c) For more is not reserved
 To man, with soul just nerved
 To act tomorrow what he learns today :
 Here work, enough to watch
 The Master work, and catch
 Hints of the proper craft, tricks of the tool's
 true play.
- (d) And when at length, the mind shall be all
 free
 From what it hates in this degraded form,
 Reft of its carnal life, save what shall be
 Existent happier in the fly and worm,—
 When elements to elements conform,
 And dust as it should be, shall I not
 Feel all I see, less dazzling, but more warm ?
 The bodiless thought ? the Spirit of each
 spot ?
 Of which, even now, I share at times the
 immortal lot ?

(e) I trust I have not wasted breath :
 I think we are not wholly brain,
 Magnetic mockeries ; not in vain,
 Like Paul with beasts, I fought with Death ;
 Not only cunning casts in clay :
 Let Science prove we are, and then
 What matters Science unto men,
 At least to me ? I would not stay.

(f) With still eyes ever on my hands,
 With eyes that seemed to burn my hands,
 My wincing, overwearied hands,
 She watched, with bloodless lips apart,
 And silent, indrawn breath :
 And every stroke my chisel cut,
 Death cut still deeper in her heart :
 The two of us were chiselling,
 Together, I and Death.

(g) I heard it all, each, every note
 Of every lung and tongue and throat,
 Ay, every rhythm and rhyme
 Of everything that lives and loves
 And upward, ever upward moves
 From lowly to sublime !
 Earth's multitudinous Sons of Light,
 I heard them lift their lyric might
 With each and every chanting sprite
 That lit the sky that wondrous night
 As far as eye could climb !

2. "The Ode (on Intimations of Immortality) resumes the theme of Wordsworth's loftier previous utterance, the Tintern Abbey," says Prof. Herford. What are the ideas common to the two poems and what the distinctive ideas ?

3. There are in *The Ancient Mariner* strands of romanticism intertwined which in other poems are exhibited singly and in variegated colours. Examine this statement.

4. "The distinguishing feature of *In Memoriam* lies beyond the domain of elegy." Show this by comparing *In Memoriam* with *Adonais*.

5. While it is true to say that in a sense Tennyson led his age, it is yet truer to say that he found his age. Show this with reference to the temper and tone of *In Memoriam*.

6. "Childe Harold combines in itself beauties drawn from all the different branches of poetry—the epic, the idyllic, the lyric, and the dramatic." Show this.

7. "The Victorian word-artists, following up the conquests made by the Romantics in every part of the lyric field, both in form and matter, have left to successors nothing of importance to achieve." Examine this statement with reference to the poetry of some of the more noted successors of Tennyson.

8. "Shelley gave a visionary body to creatures of the mind, even to principles; while with Keats we find the physical desire for beauty spiritualised into a splendid mystery." Explain and illustrate this remark.

9 Write a short commentary on *any two* of the following poems:—

Flannan Isle; The Listeners; There is a hill; Sussex.

10. With what success do Wordsworth's successors follow his theory of poetic diction?

7. Explain with reference to the context *any four* of the following:—

(a) So successful a watch and ward had been established over the young lady by this judicious parent, that she had grown up highly ornamental, but perfectly helpless and useless. With her character thus happily formed, in the first bloom of her youth she had encountered Mr. Pocket: who was also in the first bloom of youth, and not quite decided whether to mount to the Woolsack, or to roof himself in with a mitre.

(b) Believe me, without farther instance, I could show you, in all time, that every nation's vice, or virtue, was written in its art: the soldier'ship of early Greece; the sensuality of late Italy; the visionary religion of Tuscany; the splendid human energy and beauty of Venice.

(c) When Fostus put on the big pot, as it is classically called, he was quite blinded *ipso facto* to the diverting effect of the mood and manner upon others; but when disposed to be envious or quarrelsome he was rather shrewd than otherwise, and could do some pretty strokes of satire.

(d) But nowhere are things more apt to respond to the brighter weather, nowhere is there so much difference between rain and sunshine, nowhere do the clouds roll together more grandly; those quaint suburban

pastorals gathering a certain quality of grandeur from the background of the great city, with its weighty atmosphere, and portent of storm in the rapid light on dome and bleached stone steeples.

(e) We see the hall of Menelaus, we see the garden of Alcinous, we see Nausicaa among her maidens on the shore, we see the mellow monarch sitting with ivory sceptre in the market-place dealing out genial justice.

(f) But if Shelley, instead of culling Nature, crossed with its pollen the blossoms of his own soul, that Babylonian garden is his marvellous and best apology.

(Essay).

NINTH PAPER.

Time—Three hours.

1 Assign *seven* of the following passages, *four* of prose and *three* of verse, to their periods and authors, commenting on the evidence of style, subject, etc. In the verse passages comment on the metrical technique also :—

- (a) Nay, Lord, not thus! white lilies in the spring,
Sad olive-groves, or silver-breasted dove,
Teach me more clearly of Thy life and love
Than terrors of red flame and thundering,
The hill-side vines dear memories of Thee bring :
A bird at evening flying to its nest
Tells me of One who had no place of rest :
I think it is of Thee the sparrows sing.
Come rather on some autumn afternoon,

When red and brown are burnished on the leaves,
 And the fields echo to the gleaner's song.
 Come when the splendid fulness of the moon
 Looks down upon the rows of golden sheaves,
 And reap Thy harvest : we have waited long.

- (b) We'll to the woods no more,
 The laurels all are cut,
 The bowers are bare of bay
 That once the Muses wore ;
 The year draws in the day
 And soon will evening shut :
 The laurels all are cut,
 We'll to the woods no more.
 Oh we'll no more, no more
 To the leafy woods away,
 To the high wild woods of laurel
 And the bowers of bay no more.

(c) I call upon that right reverend bench, those holy ministers of the Gospel, and pious pastors of our Church—I conjure them to join in the holy work, and vindicate the religion of their God. I appeal to the wisdom and the law of this learned bench to defend and support the justice of their country. I call upon the bishops to interpose the unsullied sanctity of their lawn ; upon the learned judges to interpose the purity of their ermine, to save us from pollution. I call upon the honour of your lordships to reverence the dignity of your ancestors, and to maintain your own. I call upon the spirit and humanity of my country to vindicate the national character. I invoke the genius of the Constitution.

(d) A, Launcelot, he sayd, thou were hede of al crysten knyghtes, & now I dare say, sayd syr Ector, thou sir Launcelot, there thou lvest, that thou were never matched of erthely knyghtes hande ; & thou were the curtest knyght that ever bare shelde ; and thou were the truest frende to thy lover that ever bestrade hors ; & thou were the trewest lover of a synful man that ever loved woman ; & thou were the kyndest man that ever strake wyth swerde ; & thou were the godelyest persone that ever cam emonge prees of knyghtes ; & thou was the mekest man & the jentyllest that ever ete in halle emonge ladyes ; & thou were the sternest kayght to thy mortal foo that ever put spere in the breste.

(e) The love of Nature is ever returned double to us, not only the delighter in our delight, but by linking our sweetest, but of themselves perishable feelings to distinct and vivid images, which we ourselves, at times, and which a thousand casual recollections, recall to our memory. She is the preserver, the treasurer of our joys. Even in sickness and nervous diseases, she has peopled our imagination with lovely forms which have sometimes overpowered the inward pain and brought with them their old sensations. And even when all men have seemed to desert us and the friend of our heart has passed on, with one glance from his 'cold disliking eye'—yet even then the blue heaven is spread out and bends over us, and the little tree still shelters us under its plumage as a second cope, a domestic firmament, and the low creeping gale will sigh in the heath-plant and soothe us by sound of sympathy till the lulled grief loses itself in fixed gaze on the purple heath-blossom, till the present beauty becomes a vision of memory.

f) She had the mouth that smiles in repose. The lips met full on the centre of the bow and thinned along to a lifting dimple; the eyelids also lifted slightly at the outer corners and seemed, like the lip into the limpid cheek, quickening up the temples, as with a run of light, or the ascension indicated off a shoot of colour. Her features were playfellows of one another, none of them pretending to rigid correctness, nor the ~~news~~ to the ordinary dignity of governess among merry girls, despite which the nose was of a fair design, not acutely interrogative or inviting to gambols. Aspens imaged in water, waiting for the breeze, would offer a susceptible lover some suggestion of her face: a pure smooth-white face, tenderly flushed in the cheeks, where the gentle dints were faintly inter-melting even during quietness.

(g) To feel, and in order to feel to express, or at least to understand the expression of all that is lovely in Nature, of all that is poignant and sensitive in man, is to us in itself a sufficient end. A rose in a moonlit garden, the shadow of trees on the turf, almond blossom, scent of pine, the wine-cup and the guitar; these and the pathos of life and death, the long embrace, the hand stretched out in vain, the moment that glides for ever away, with its freight of

music and light, into the shadow and hush of the haunted past. all that we have, all that eludes us. a bird on the wing, a perfume escaped on the gale,—to all these things we are trained to respond, and the response is what we call literature.

- (h) What has the sea swept up ?
 A Viking oar, long mouldered in the peace
 Of grey oblivion ? Some dim-burning bowl
 Of unmixed gold, from far-off island feasts ?
 Ropes of old pearls ? Masses of ambergris ?
 Something of elfdom from the ghastly isles
 Where white hot rocks pierce through the
 flying spiudrift ?
 Or a pale sea-queen, close wound in a net of spells :
 Nothing of these. Nothing of antique
 splendours
 That have a weariness about their names :
 But—fresh and new, in frail transparency,
 Pink as a baby's nail, silky and veined
 As a flower petal—this casket of the sea,
 One shell.
- (i) When she saw him, she gan for sorwe anoon,
 His tery face a-twixe hir armes hyde,
 For which this Pandare is so wo bi-gooun,
 That in the hous he mighte unnethe abyde
 As he that pitee felte on every syde.
- (j) Ay me that dreerie death should strike so
 mortall stroke,
 That can undoe Dame natures kindly course ;
 The faded lockes fall from the loftie oke,
 The flouds do gaspe, for dryed is theyr sourse,
 And flouds of teares flowe in theyr stead
 perforce.
- (k) No voice is here, or none that hinders thought.
 The redbreast warbles still, but is content
 With slender notes, and more than half-
 suppressed :
 Pleased with his solitude, and flitting light
 From spray to spray, where'er he rests he
 shakes
 From many a twig the pendent drops of ice,
 That tinkle in the withered leaves below.

- (4) I have ventur'd,
 Like little wanton boys that swim on bladders.
 This many summers in a sea of glory ;
 But far beyond my depth : my high-blown pride
 At length broke under me : and now has left
 me,
 Weary and old with service, to the mercy
 Of a rude stream, that must for ever hide me.

(m) He was in the thirty-third year of his age, that earlier climacteric, when the men with vision first feel conscious of a past, and reflectively mark its shadow. The narrowness of the cribbed deck that we are doomed to tread, amid the vast space of an eternal sea with fair shores dimly seen and never neared, oppresses the soul with a burden that sorely tries its strength, when the fixed limits first define themselves before it. Those are the strongest who do not tremble beneath this gray ghostly light, but make it the precursor of an industrious day.

SECOND PAPER.

*Time—Three hours.**(Question 5 carries 25 marks ; other questions are of equal value.)*

FOURTH PAPER.

Time—Three hours.

1 Translate the following into Sanskrit :—

The idea of 'good' is one of those sacred words, or forms of thought, which were beginning to take the place of the old mythology. It meant unity in which all time and all existence were gathered up. It was the truth of all things, and also the light in which they shone forth, and became evidence to intelligences, human and divine. It was the cause of all things, the power by which they were brought into being. It was the universal reason divested of a human personality. It was the life as well as the light of the world; all knowledge and all power were comprehended in it. The way to it was through the sciences, and these too were dependent on it. To ask whether God was the maker of it or made by it, would be like asking whether God could be conceived apart from goodness, or goodness

apart from God. The God is not really at variance with the idea of 'good' ; they are aspects of the same, differing only as the personal from the impersonal, or the masculine from the neuter, the one being the expression of mythology, the other of philosophy.

2. Write an essay in Sanskrit, covering 5 to 7 pages of your answer-book, on *any one* of the following subjects:—

(a) ' कर्मण्येवाधिकारस्ते मा फलेषु कदाचन ' ।

2. Translate the following passages into Arabic :—

(a) When this army was dispersed, Rustam went in search of the Div-i-Sufid, who ignorant of fate of his followers, slumbered in the recesses of a cavern, the entrance to which looked so dark and gloomy that the Persian hero hesitated whether he should advance. But the noise of his approach had roused his enemy who came forth clad in complete armour. His appearance was terrible. But Rustam struck a desperate blow, which severed the leg of the Div from his body. Irritated by the loss of a limb, the monster seized his enemy in his arms and endeavoured to throw him down. The struggle was for some time doubtful. Rustam collected all his strength, dashed his foe to the ground, and seizing him by one of his horns unsheathed his dagger and stabbed him to the heart. The Div-i Sufid

instantly expired, and Rustam, on looking to the entrance of the cavern, whence innumerable Divs were issuing to help their lord, perceived they were all dead. When the chief was slain, they all expired too.

(b) A lofty mountain soon appeared in sight, covered to the summit with trees. Hâtim ascended these shady groves, through which flowed rivulets of pure water, and cooling breezes wafted a delicious fragrance. Here he met a man who warned him that the confines of the desert were peopled by damsels of surpassing beauty. If he yielded to them, he was lost for ever. But if he grasped the hand of any one of them, she would be compelled to forward him to his destination. This advice sank deep in Hâtim's soul, and he was resolved to pursue it. The next day he reached the borders of a lake from which a nymph arose, and seizing Hâtim, hurried him into the deep. But he remembered the advice given to him. He held firmly to his purpose, saying to himself, "This is all enchantment, and cannot harm me."

Discuss the possibility of ethical transformation, reproducing the arguments of Nasir Tusi.

2. How does the author of اخلاق ناصری prove the following propositions? State his argument in simple Persian prose :—

- (۱) نفس جوهر بسیط است *
- (۲) نفس نه جسم است نه جسمانی *
- (۳) هرکه بوحدت نزدیک تر وجود او شریف تر *
- (a) در فضائل هیچ فضیلت کامل تر از عدالت نیست چه وسط حقیقی عدالت است (نصیر طوسی) *
- (b) محبت افضل از عدالت باشد چه محبت وحدتی است شبیه به طبیعی و عدالت شبیه به صناعی (جلال الدین دوانی) *

نباشد بلکه به نهایت و سطوح تواند بود و این
 تلاقی بدرجه آن اتصال نرسد و چون جوهر بسیط
 که نفس انسانی است از کدورات جسمانی پاک
 گردد و محبت لذات طبیعی ازو محو شود بهکم
 مناسبت بعالم قدوس منجذب شود و بنظر بصیرت
 مشاهده جهال حقیقی نماید و پروانه صفت هستی

4. Investigate a formula for the time of sunrise at a place on the Earth's surface whose latitude is known.

If two stars rise simultaneously in azimuths which are supplementary, show that one is as long above the horizon as the other is below it; and if $2z$ be the difference of their azimuths, and $2t$ hours the difference between their times of setting, show that the latitude ϕ of the place is given by

$$\sin \phi = \cot z \tan (7\frac{1}{2} t).$$

5. (a) Describe Sumner's method of finding the position of a ship.

where a and b are the radii of the orbits ($b > a$).

FOURTH PAPER (b)

(Electricity, Magnetism, and Attractions)

Time—Three hours.

N.B.—You are permitted to attempt six questions only.

1. (a) If there are two equal point charges at A and B and if C be the middle point, shew that the asymptotes to the lines of force pass through C . Shew also that

$$\sin \frac{1}{2}\theta = \sqrt{2} \sin \frac{1}{2}\phi,$$

where θ is the angle which the tangent at A to a line of force from A makes with BA produced, and ϕ is the angle which the asymptote to this line of force makes with BA .

(b) Shew that the equations of the lines of force from collinear charges may be expressed in the form

$$\Sigma e_i \cos \theta_i = \text{const.},$$

where $e_1, e_2, \theta_1, \theta_2$, etc., have their usual meanings.

2. A and C are spherical conductors with charges $e + e$ and $-e$ respectively. Shew that there is either a point or a line of equilibrium, depending on the relative size and positions of the spheres and on $\frac{r}{e}$. Draw a

diagram for each case, giving the lines of force and the sections of the equipotentials by a plane through the centres.

3. A soap-bubble of radius a is formed by a film of tension T , the external atmospheric pressure being H . The bubble is touched by a wire from a large conductor at potential V , and the film is an electrical conductor. Prove that its radius increases to r , given by

$$H(r^3 - a^3) + 2T(r^2 - a^2) = \frac{V^2 r}{8\pi}.$$

4. A point charge is placed in front of an infinite slab of dielectric, bounded by a plane face. Find its image (i) corresponding to the field in air, and (ii) corresponding to the field in the dielectric.

The angle between a line of force in the dielectric and the normal to the face of the slab is α ; the angle

between the same two lines in the immediate neighbourhood of the charge is β . Prove that α, β are connected by the relation

$$\sin \frac{\beta}{2} = \frac{\sqrt{1+K}}{\sqrt{1+K}} \sin \frac{\alpha}{2}.$$

5. An underground cable of length a is badly insulated so that it has faults throughout its length indefinitely near to one another and uniformly distributed. Find the expression for the potential at a distance x along the cable, if the conductivity of the faults is $\frac{1}{\rho'}$ per unit length, and the resistance of the cable is ρ per unit length. If one pole of the battery is connected to one end of a cable and the other pole is earthed, prove that the current at the farther end is the same as if the cable were free from faults and of total resistance

$$\sqrt{\rho\rho'} \sinh \left(a \sqrt{\frac{\rho}{\rho'}} \right).$$

6. Enunciate Kirchhoff's two laws for steady currents in linear conductors.

If n points are joined two and two by wires of equal resistance r , and two of them are connected to the electrodes of a battery of electromotive force E and resistance R , shew that the current in the wire joining the two points is

$$\frac{2E}{2r+nR}.$$

7. Define the intensity and direction of magnetisation at any point of a magnetised body.

If Ω_q be the potential at any external point Q due to a uniformly magnetised body, and if V_q be the potential of a uniform distribution of electricity of volume density unity throughout the region occupied by the magnet at the same point Q , shew then

$$\Omega_q = -I \frac{\partial V_q}{\partial s}$$

where $\frac{\partial}{\partial s}$ denotes differentiation with respect to the co-

ordinates of Q in a direction parallel to the magnetisation of the body, and I is the intensity of magnetisation.

Shew also that the potential at any external point is the same as that of a surface distribution of magnetic poles of density $I \cos \theta$ per unit area spread over the surface of a magnet.

8. Explain thoroughly how it arises that the magnetic action of an electric current traversing a wire may be calculated by means of the magnetic action of an open magnetic shell.

A wire coil is wound in the form of a helix on a right circular cylinder, these being n turns per unit length of the axis of the cylinder, and a current traverses the coil. The *equivalent shell* is constructed, and a closed path is drawn traversing the axis of the coil and returning to the starting point via the space outside the coil. Contrast the magnetic force and the magnetic potential of the coil and of the shell at all points of the path, taking care to specify all the discontinuities.

9. A tangent galvanometer had two concentric and coplanar coils of radii r_1 and r_2 respectively, and the coils are wound with equal lengths of the same wire. If a given potential difference is applied, first to coil (one) giving a deflection α_1 , and then to coil (two) giving a deflection α_2 , shew that

$$\frac{\tan \alpha_1}{\tan \alpha_2} \parallel \frac{r_2^2}{r_1^2}.$$

The coils are now connected in parallel and the same potential difference is applied. When the connections are such that the currents in the coils circulate in the same direction the deflection is β_1 , and when the currents circulate in opposite directions the deflection is β_2 ; shew that

$$\frac{\tan \beta_1}{\tan \beta_2} = \frac{r_2^2 + r_1^2}{r_2^2 - r_1^2}.$$

10. Two rigid and equal semi-circular arcs of matter with uniform section and density are hinged together at both extremities. The matter attracts according to the law of gravitation. If equal and opposite forces applied along the line joining the middle points of the semi-circles keep them apart with their planes at right

angles, prove that the magnitude of each force will be $4m^2 \log(1 + \sqrt{2})$, where m is the mass of unit length of arc.

11. Shew that the attraction of any homogeneous shell bounded by similar and similarly situated concentric ellipsoid at any internal point is zero. Shew also that the resultant attraction of a thin ellipsoidal shell bounded by similar ellipsoids at an external point close

to the surface is equal to $\frac{Mp}{abc}$ and its direction is normal

to the surface; where M is the mass, a, b, c are the semi-axes of the ellipsoid, and p is the perpendicular from the centre to the tangent plane at the near point where the normal to the surface passes through the external point. FIRST PAPER.

Time—Three hours.

[N.B.—Any six questions fully and carefully answered will secure full marks.]

1. Develop Dedekind's theory of real numbers. In accordance with this theory when are two real numbers said to be equal or unequal to, greater or less than each other?

2. Define continuity and discontinuity of a function at a point and give examples to illustrate them. If $f(a)$ and $f(b)$ are of different signs and $f(x)$ is continuous in the interval (a, b) , as x passes from a to b , show that for at least one value of x between a and b , $f(x) = 0$.

Find the points of continuity and discontinuity of the function $f(x)$ defined for the interval $(0, 1)$ as follows:—

$f(x) = 0$; when x is irrational;

$f(x) = \frac{1}{q}$, when $x = \frac{p}{q}$, where $\frac{p}{q}$ is in its lowest

terms;

$f(0) = 0 = f(1)$.

3. (a) Taking Riemann's notion of the definite integral, state (without proof) two forms in which the condition of integrability, both *necessary* and *sufficient*, can be put.

If the value of the integrable function $f(x)$ is altered at a finite number of points of (a, b) , prove that the function $\phi(x)$ thus obtained is integrable in (a, b) , and its integral is the same as that of $f(x)$.

(b) A function $f(x)$ is defined as follows:—

$$f(x) = (x - w_1)(x - w_2)^2(x - w_3)^3 \sin \frac{1}{(x - w_1)} \sin \frac{1}{(x - w_2)} \sin$$

$\frac{1}{(x-w_3)}$ for all values of x , excepting w_1, w_2, w_3 in a domain (a, b) , and $f(x)=0$, when $x=w_1$ or w_2 or w_3 . Show that

(i) $\frac{df}{dx}$ does not exist at the point $x=w_1$.

(ii) $\frac{df}{dx}$ exists, but has a discontinuity of the 2nd

kind at $x=w_2$.

(iii) $\frac{df}{dx}$ exists and is continuous at $x=w_3$.

4. (a) Define the convergence of an infinite integral and discuss the convergence or divergence of the integral

$$\int_0^{\infty} e^{-x} x^{n-1} dx.$$

(b) Find all the values of x for which the series

$$e^x \sin x + e^{2x} \sin 2x + \dots$$

converges. Does it converge uniformly for these values? For what values of x can the series be differentiated term by term?

5. If $S = a_1 + a_2 + a_3 + \dots + a_n + \dots$, be an absolutely convergent series, and

$$S' = b_1 + b_2 + b_3 + \dots + b_n + \dots,$$

be a semi-convergent series, then prove that the series $a_1 b_1 + (a_1 b_2 + a_2 b_1) + \dots + (a_1 b_n + a_2 b_{n-1} + \dots + a_n b_1) + \dots$ is convergent and its limiting sum is SS' .

Show that by suitably rearranging the terms of the series

$$1 - \frac{1}{2} + \frac{1}{3} - \frac{1}{4} + \dots + \frac{1}{2n-1} - \frac{1}{2n} + \dots,$$

a series can be obtained which will converge to $\frac{3}{2} \log_e 2$.

6. Define the generalised logarithm of a number to a given base.

Find all the values of $(\sqrt{-2})^{\sqrt{-2}}$.

Prove that

$$(1 + \sqrt{-1})^{(\log_e \sqrt{2 - \frac{\pi}{4}} \sqrt{-1})}$$

is a real number.

7. State (without proof) that necessary and sufficient condition for the convergence of an infinite product. If z be a complex variable, prove rigorously that

$$\cos z = \left(1 - \frac{4z^2}{\pi^2}\right) \left(1 - \frac{4z^2}{3^2\pi^2}\right) \left(1 - \frac{4z^2}{5^2\pi^2}\right) \dots \text{to}$$

infinity.

Show from its product formula that $\cos z$ is periodic.

8. Find the condition that two given surfaces may be conformally representible on one another and hence show that to every conformal representation of a plane on a plane there corresponds an analytic function.

Show that the rhumb-lines (loxodromes) on a sphere become equiangular spirals in a stereographic projection.

9. (a) Prove carefully that an algebraic equation of the n th degree has n roots.

(b) Find the different developments of the function

$$\frac{1}{(z^2 + 1)(z - 2)}$$

in positive or negative powers of z , according to the position of the point z in the plane.

10. Apply the calculus of residues to evaluate

$$(i) \int_{-\infty}^{+\infty} \frac{e^{ax} - e^{bx}}{1 - e^x} dx,$$

where the real parts of a and b are positive and less than unity.

$$(ii) \int_0^{\infty} \frac{x^2 dx}{(x^2 - a^2)^2 + b^2 x^2},$$

b being positive.

9. Define a *line of curvature* on a surface. If O and P are adjacent and ultimately coincident points of a line of curvature, prove that the normals to the surface at O and P intersect, and conversely.
